

The Exploration of the Pluto System and Kuiper Belt Object Arrokoth by New Horizons: The Farthest Exploration of Worlds in History

Alan Stern

Associate Vice President, Space Sector, Southwest Research Institute

The NASA New Horizons mission made the first spacecraft explorations of the Pluto System and a Kuiper Belt Object (KBO). This talk will summarize the mission, the scientific payload it carries, and many of the scientific findings from these two landmark explorations. The talk will conclude with a look at the continuing mission of New Horizons as it explores farther in the Kuiper Belt.
